Projects

MyCampus Hub, College Management System
Tech Stack: PHP, MySQL, JavaScript
Live Demo: https://mycampus-hub.free.nf
A college management system designed to streamline student records, scheduling, and campus communication. Built to simplify day-to-day college operations and improve administrative efficiency.

- Architected a relational database schema in MySQL to manage student records, courses, and scheduling
- Developed an attendance and study material management system for both students and teachers
- Built a communication portal enabling real-time updates between students and staff

JerseyFlow, E-Commerce Website
Tech Stack: PHP, MySQL, HTML, CSS, JavaScript
Live Demo: https://jersey-flow.free.nf/
An online jersey shopping platform providing a smooth and user-friendly shopping experience with full cart and order management functionality.

- Engineered product browsing, cart, and order management features using PHP and MySQL
- Integrated the eSewa payment gateway (sandbox environment) to simulate real-world transaction flows
- Styled the interface using custom CSS for a clean, user-friendly shopping experience

Work & Volunteer Experience

Receptionist 2021 – 2022
Shree Swoyambhu Harati Mata Clinic & Lab, Swoyambhu, Kathmandu

- Coordinated scheduling for 20+ daily patient appointments, improving clinic workflow efficiency through organized record management.
- Maintained accurate patient records and coordinated communication between clinic staff and visiting patients

Active General Member 2022 – Present
Prime Cultural Club, Prime College, Kathmandu

- Organized and coordinated college cultural events as part of a collaborative team
- Developed interpersonal, teamwork, and organizational skills through hands-on event execution
